SPECIALIZED DECORATIVE PLANT LIST ON BACK PAGES

1919==TO==1940

From a comparatively small start consisting of . . . 33 acres of miscellaneous stock of an irregular and indefinite quality . . . an organization of ten men . . . one small truck . . . practically no equipment . . . and a very limited space of lath house . . . Roy F. Wilcox & Co. has grown materially during the past twenty-one years to a progressive organization of from 85 to 150 men . . . with the most modern machinery and equipment for scientific growing and efficient working conditions . . . specializing in the production of unusual items such as . . . Kentia palms, grown in an area of 25 acres of modern lath house . . . decorative plants artistically arranged in modern schemes . . . and 125 acres devoted to specimen trees and shrubs for landscaping . . . all fine items which are "different."

A reputation has truly been established for exceptional and dependable quality at very moderate prices.

This fine growth and expansion has been due to the response of our many friends and fine customers and the utmost efforts will always be made for your continued confidence.

Appreciative of Your Confidence

WE ARE PROUD OF THIS

GOLDEN GATE INTERNATIONAL EXPOSITION

"ON SAN FRANCISCO BAY"

EXECUTIVE OFFICES

October 11, 1939

Roy F. Wilcox Co.
Montebello, Calif.

Gentlemen:

I have just completed my final inspection of the landscape treatment of the State of California section of the Golden Gate International Exposition in preparation of my final report to the Commission and I cannot refrain from telling you how pleased I have been with both the plants and services which you furnished.

In almost every instance your prices were lower than those of competitive bidders. The work of your organization and the deliveries of stock, both by rail car loads and by trucks, were all that could be asked and far more prompt and efficiently handled than I had expected under the trying conditions made unavoidable by the schedule of building operations and the shortness of time.

The high quality of the stock and its condition on arrival need no better testimonial than the fact that nearly every tree, shrub and plant is thriving today after eight months of the most trying weather and soil conditions. In fact, out of more than 100,000 plants, only 27 were rejected, which you replaced without question, adding some fifty specimens for good measure.

It seems strange that during thirty years of practice in landscape architecture, mostly on the Pacific Coast, I should have had no dealings with the Roy F. Wilcox Company until the problem of the California section of the Golden Gate International Exposition arose. This I deeply regret, for it has been as great a loss to me and my clients as it has to your company.

In sincere gratitude for your splendid cooperation, I beg to remain,

Cordially yours,

Mark Daniels, A. I. A.
Landscape Architect for the California
Commission, Golden Gate International Exposition

MD:ldg

INTRODUCING

Wilcox
"Blue Ribbon Trees"

Now offering Wilcox quality trees in special sizes, superior in many ways to stock of similar age in 5-gallon cans.

FIELD GROWN
HEAVIER CALIPER
HEALTHIER GROWTH
WELL ROOTED

We offer you this special stock at exceptionally low prices in addition to our regular supply of transplanted trees.

Every outstanding success is built on the ability to do better than just good enough.

Cheap merchandise is like a cheap man. Both are far too costly in the end.

Goods, cheaply priced because poorly made, rob the seller of self-respect and the buyer of satisfaction.

Windmill palm (see *Chamaerops*)

Five minutes of thought are often better than an hour of hustle.

There's no better recommendation than a good reputation.

Courteous people are usually treated courteously.
